SUMMARY

Front-end developer with 3+ years of experience specializing in Next.js, React.js, Tailwind CSS, Bootstrap, and Redux. Adept at creating responsive, user-friendly interfaces with a strong focus on performance and accessibility. Seeking to leverage my skills in modern front-end technologies to contribute to a dynamic development team and deliver impactful web applications.

WORK HISTORY

Frontend Developer | Upwork , Mostaql, Freelancer

july 2022 - present

- Developed new user-facing features using React.JS and Next.JS
- Built reusable components and front-end libraries for future use
- Translated designs and wireframes into high-quality code
- Optimized components for maximum performance across various web-capable devices and browsers
- Collaborated with cross-functional teams to deliver high-quality solutions
- Troubleshoot and debugged software issues in a large codebase
- Work on improving SEO

Frontend Developer | Falsafa Raqamia

2024 - 2025

- Developed and maintained responsive web applications using React.js, ensuring high performance.
- Built reusable and scalable UI components to improve development efficiency and maintain consistent design across the platform.
- Integrated RESTful APIs to handle dynamic data such as product listings, user authentication, and order information.
- Implemented state management and form handling to manage complex user interactions and improve application reliability.

PROJECTS

E-Commerce Website (React.js, Next.js, Strapi, Tailwind CSS)

- Developed a modern, scalable e-commerce frontend focused on performance, usability, and maintainable component architecture.

Features:

- Designed and implemented a modular React component architecture to create reusable UI components across the product catalog, cart, and checkout flows.
- Implemented Stripe for secure payment processing, including multi-currency support and order management
- Developed form validation and controlled inputs using modern React patterns to handle authentication and checkout workflows.
- Styled the website with Tailwind CSS, focusing on creating a modern, mobile-first user interface
- Optimized performance with Next.js's server-side rendering (SSR) and static generation for faster load times and improved SEO
- Integrated REST APIs to fetch products, manage cart operations, and handle order creation.

saeed-dev-ecommerce.vercel.app

Admin dashboard Application (React.js, Firebase, MUI)

Description:

•Created a dashboard application using React.js, Tailwind CSS, and Firebase for database management and authentication. It features a task system, a calendar for event handling, and analytics charts.

Features:

•Integrated Firebase for real-time data synchronization and user authentication.

•Outcome: managing products, orders, users, and analytics.

•Designed a sleek and responsive user interface using Tailwind CSS, with a focus on clean design and ease of use.
